# Utello

*Zéro appel manqué. Zéro client perdu.*

CATALOGUE  
DES INTÉGRATIONS NATIVES NO-CODE

3 297

applications et API connectées nativement

**utello.io**

*Catalogue à jour au 06/03/2026*

## Utello / L'écosystème d'intégrations le plus large du marché

### ■ Pourquoi 3 297 intégrations changent la donne

Utello connecte nativement votre téléphonie IA à 3 297 applications et API parmi les plus utilisées au monde. CRM, ERP, billetterie, support, marketing, finance, RH, e-commerce, productivité : chaque intégration est préconfigurée et activable en quelques clics, sans développement spécifique.

Concrètement, dès qu'un appel entre, sort ou se termine, la donnée alimente automatiquement le système métier de votre choix. Création de fiche prospect, déclenchement de campagne, ouverture de ticket, mise à jour d'opportunité, scoring, qualification, notifications, reporting : votre agent vocal devient un véritable hub opérationnel relié à l'ensemble de votre stack.

### ■ Ce que cela vous apporte

- Zéro double saisie. La donnée d'appel alimente automatiquement vos outils métiers.
- Délais de mise en service réduits. Pas d'API à développer, les connecteurs sont déjà certifiés.
- Coût d'intégration maîtrisé. Activation en mode no-code, sans dépendance éditeur.
- Écosystème ouvert et durable. 3 297 intégrations couvrent votre stack actuelle et future.
- ROI mesurable. Productivité commerciale, qualité de service, réduction des appels perdus.

### ■ Couverture fonctionnelle

Le catalogue couvre toutes les briques métier d'une PME ou ETI moderne : CRM et automatisation commerciale (Salesforce, HubSpot, Pipedrive, Zoho CRM, Microsoft Dynamics), support client et helpdesk (Zendesk, Freshdesk, Intercom, ServiceNow), e-commerce et facturation (Shopify, WooCommerce, Stripe, PayPal, QuickBooks, Sage), marketing et messaging (Mailchimp, Brevo, Twilio, WhatsApp Business), RH et paie (BambooHR, Personio, Gusto, Rippling), productivité et collaboration (Microsoft 365, Google Workspace, Slack, Notion, Trello), data et BI (Snowflake, BigQuery, Tableau, Power BI), ainsi que les principaux services d'IA générative (OpenAI, Anthropic, Mistral AI, Google Gemini, ElevenLabs).

### ■ Mode opératoire

Chaque intégration suit la même logique : authentification sécurisée, sélection du déclencheur côté agent vocal, mapping des champs, activation. Les workflows sont versionnés, journalisés et conformes RGPD. Hébergement en France. Mise en production typique sous 30 jours.

## Répartition par lettre

Vue d'ensemble des 3 297 intégrations disponibles, classées par lettre initiale.

# 18	A 232	B 168	C 276

# Passez à l'action.

*Votre agent IA vocal vous attend.*

## Prochaines étapes

- Cadrage des intégrations prioritaires sur votre stack actuelle (CRM, ERP, helpdesk, marketing).
- Démonstration ciblée d'un workflow d'appel relié à votre outil principal.
- Devis Utello incluant déploiement et accompagnement par nos ingénieurs.

## À propos d'Utello

Utello est une solution d'IA vocale conversationnelle qui gère vos appels entrants et sortants, 24h/24, 7j/7. Décroché automatique, qualification en temps réel, prise de rendez-vous, routage intelligent, transfert vers un agent humain : votre standard travaille en continu, sans renforcement d'équipe.

Plus de 250 entreprises clientes actives, plus de 3 millions d'appels traités par mois sur la plateforme, 40 % des appels traités en autonomie totale. Hébergement en France, conformité RGPD garantie, choix du modèle IA selon votre niveau d'exigence de confidentialité.
